

This template is an original experimental design for collecting pronoun and reflexive production data. To make this exact implementation work, however, one requires the Art Explosion CDs created by Nova Development, which is a paid, proprietary product. You must purchase your own copy from www.novadevelopment.com, or create your own pictures. Some of the pictures in this implementation are CC-BY-NC licensed and can be downloaded from Yangchen Roy's website.

Author: Yangchen Roy
